call for papers

Special issue for MCDM 2022 papers

The objective of the special issue in the Multiple Criteria Decision Making (MCDM) journal (ISSN 2084-1531) is to publish recent theoretical surveys, case studies, and real applications related to the field of Multiple Criteria Decision Aiding presented during the MCDM 2022 conference at University of Portsmouth, UK. The MCDM journal is a peer-reviewed annual, published by the University of Economics in Katowice, Poland, and indexed in EBSCOhost, Proquest, CEJSH, and BazEkon. All articles published in the MCDM journal are licensed under a Creative Commons Attribution-NonCommercial International License and are available online.

Although we expect submissions from the authors who presented their work at the MCDM 2022 conference in Portsmouth, this call is also open to the entire community of academics and practitioners researching the field of MCDA.

The deadline for submission is July 15, 2022.

Topics for this special issue may include, but are not limited to:

- advances in MCDA theory, new approaches, and decision support systems,
- preference elicitation and modeling,
- handling imperfect data in MCDA,
- group decision making,
- multiobjective optimization,
- multiobjective hybrid/parallel metaheuristics,
- interactive methods,
- fuzzy and stochastic multiobjective optimization programming,
- goal programming,
- applications of MCDA and multiobjective optimization to: planning and scheduling, logistic and routing problems, time tabling, cutting problem, knapsack problems, portfolio optimization, set covering, clustering, packing, datamining, health and environment and bioinformatics.

Paper length must be between 10 and 20 pages. Detailed editorial and content requirements can be found on the journal webpage (mcdm.ue.katowice.pl)

Manuscripts should not have been previously published nor be currently under consideration for publication elsewhere.
